

This page presents the current curated display palette for quick visual orientation. It is smaller and calmer than the extracted BTAS source swatches. Page 2 continues the curated accent families.

BTAS/TNBA Color System Packet

Curated workstation palette - greens, blues, warms

Display labels are not implementation tokens

GREENS

Deep Green
#1F3B2C
31, 59, 44

Soft Green
#2F5A45
47, 90, 69

Balanced Green
#3E7357
62, 115, 87

Root Green
#4F8E6C
79, 142, 108

Bright Green
#69C090
105, 192, 144

BLUES

Deep Blue
#1E2F5C
30, 47, 92

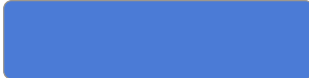

Subtle Navy
#243B73
36, 59, 115

Balanced Blue
#2C4C8A
44, 76, 138

Bright Blue
#355FA8
53, 95, 168

Highlight Blue
#4B7BD6
75, 123, 214

WARMS

Auburn
#8A3B2E
138, 59, 46

Brick Red
#A33A32
163, 58, 50

Rust
#B24E2E
178, 78, 46

Ochre
#C48A2C
196, 138, 44

Dusty Amber
#A67C34
166, 124, 52

BTAS/TNBA Color System Packet

Extracted source swatches - rows 1-3

Extracted source values; scan-sampled, not official Pantone conversions

These swatches preserve source-scan provenance and stronger source-aligned variation. Candidate `yam_*` names are derivation notes, not final runtime tokens.

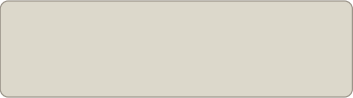

yam_neutral_white White #FEFEFC 254, 254, 252 WHITE row 1	yam_amber_signal_yellow PMS 113 #FDD309 253, 211, 9 69Y 6M row 1	yam_amber_sun PMS 142 #FCAC11 252, 172, 17 76Y 23M row 1	yam_amber_burnished PMS 131 #E78919 231, 137, 25 100Y 27M 8K row 1	yam_red_signal PMS 179 #DB1817 219, 24, 23 94Y 79M row 2

What this packet is

A human-friendly visual packet for the BTAS/TNBA-inspired color system. Pages 1-2 summarize the curated workstation palette. Pages 3-4 preserve the full extracted source swatches. Page 5 explains provenance and usage boundaries.

What this packet is not

- not the official Pantone sheet
- not a full accessibility matrix
- not a final cross-repo semantic token manifest
- not a component-level YAM style specification

Correct page navigation

Pages 1-2: curated palette overview
Pages 3-4: full extracted source swatches
Page 5: provenance, separation of concerns, and runtime-boundary notes

Source-of-truth chain

1. Extracted source SSOT: themes/yam_btas_extracted_swatches.md
2. Curated workstation master palette: themes/btas-tnba_color_palette.md
3. Human reference guide: themes/btas-tnba_reference_guide.md
4. Printable sheet source: themes/btas-tnba_reference_sheet.md
5. YAM-side usage guide: docs/palette-reference.md

Runtime role mapping belongs later

Semantic color roles should be defined separately from curated palette values. A color card such as Bright Blue / #355FA8 is a visual value; it only becomes a runtime decision when a project maps it to a semantic role and then to a component use.

Example only - not a claim of full cross-repo implementation

Curated color	Bright Blue / #355FA8
Semantic token	accent.primary
Component token	hud.footer.keybind.fg
Runtime use	Ratatui footer keybind label
